Course: Architectural Composition — credits: 5

Course code	BVVH25ADCOMP
Name	Architectural Composition
Study year	2025-2026
ECTS credits	5
Language	English
Coordinator	V. Diderich-Georgievska

Modes of delivery

Action learning
Assignment
Guest lecture
Individual supervision
Lecture
Peer feedback
Problem-based learning
Project-based learning
Simulation
Supervision

Assessments

Composition - Assignment

Learning outcomes

1. The student can analyze and design spatial compositions using fundamental design principles. 60% - level2 - Design/ Systems thinking
2. The student can apply 2D and 3D visualization techniques within the design process. 40% - level 2 - Communication/ Collaboration Ability

Content

This module focuses on various architectural drawing and presentation techniques. These techniques are explored through visual research into the spatial properties and proportions of geometric forms and patterns in architecture. The emphasis is placed on both manual and digital presentations (2D and 3D), models, diagrams, symbols, and imagery (photography). These techniques are then applied in research into the ordering and composition of space and mass, in relation to architectural design and a set of fundamental architectural principles.

Included in programme(s)

Built Environment
Minor Architectural Design
Built Environment Exchange Blended International Program (autumn)
Built Environment Exchange Architectural Design (autumn)

School(s)

Institute of Future Environments
