Vak: Internship

credits: 30

Vakcode	GTVB23INT
Naam	Internship
Studiejaar	2026-2027
ECTS credits	30
Taal	Engels
Coördinator	C. .A. Amaro Madariaga
Werkvormen	Werkcollege
Toetsen	Internship - Overige toetsing

Leeruitkomsten

Learning Outcomes

In a development portfolio, you must collect evidence and reflect on competences E, F, and G (these are mandatory) and one to your liking (one of A, B, C, or D). Per competency you choose one learning outcome to concentrate on.

Startup Route:

In the Startup Route students can do their internship in their own (startup) company. Due to the importance of competency A for starting or growing a business, competences A, E, F and G are mandatory in the Startup Route CMGT.

Inhoud

The internship is an external learning situation in which you work on the CMGT competencies.

During a period of 20 calendar weeks, you will work at a company of your choice, provided you work with professionals with CMGT related skills you can learn from. During that time, your schedule mirrors that of a company employee. This means that you follow the same daily hours as the company you work at, observe the same company rules, enjoy the same holidays, and exhibit the same professional behavior. It is a challenging but often rewarding period where you will discover much about both the field and your professional self.

The internship has three main goals:

You can apply the theory, knowledge and skills learned in programme to professional practices in the real world.

You understand the tension between theoretical concepts and practical applications outside of the CMGT classrooms.

You observe, reflect and learn about yourself as a future professional.

To reflect this, credits are not awarded for merely experiencing the outside world and fulfilling your job, but for the learning that takes place in this period. This is why you will create a development portfolio in which you will not only collect evidence of CMGT-related activities (like for example concepting, designing, developing, programming, or testing) but mostly will reflect on these activities to display your learning process.

Students can follow the CMGT Startup Route and do an internship in their own (startup) company.

Opgenomen in opleiding(en)

Creative Media & Game Technologies

School(s)

Kunst, Ontwerp & Ruimte

share your talent. move the world.
