Learning outcomes

No content available

Content

The goal of this project is to deliver a piece of software for a client in the real world.

Based on interviews with the client:

Writing an offer

Writing a Project Initiation document

Report written and oral on realization, issues and progress

Realize a design and software of the application

Deliver a test report and demonstrate functionality

Project peer feedback, academic counseling and applying the research method learned, are a part of the portfolio assessment

Academic Counselling (0,5 EC): Content: 4 Workshops (can be scheduled in p1 , 2 , 3 or 4) about Networking, Belbin, Core Quadrants and Job Application. The student learns how to reflect on these topics in a report. Grading: Pass/Fail

Peer Feedback (1 EC): Content: Evaluate team work, reflect on strengths and weaknesses of yourself, your team members and the project group as a whole. Grading: Pass/Fail/Excellent
