ECTS credits	2		
Language	English		
Coordinator	T.B. Dijkhuis		

Learning outcomes

The student can apply personal skills, professional skills and management skills to achieve strategic goals and enhance professional and corporate success.

Content

As an IT professional, students should be able to act as a consultant giving advice to other professionals within an organization. Consultancy is a complex skill which leans heavily on communicative competencies. The theory provided in this course forms the starting point of a learning curve. However, the essence of the course consists of applying this theoretical knowledge in practice, in a simulated IT context.
