Learning outcomes

1. Demonstrates leadership and the ability to independently achieve goals within a work unit (or project), derived from organizational goals and applicable norms and values.
5. Demonstrates an investigative and critical attitude towards daily activities and processes and substantiates, using evidence, actions and considerations to improve the primary process within the work unit.
6. Communicates his or her vision on care and health, service provision and leadership in an understandable way and gives meaning to it by connecting this vision to the vision and goals of the organization.

Content

In the graduation module, a number of aspects of the Associate degree program come together. You come up with proposals for improvement with regard to the effectiveness and efficiency of work processes and you learn how to set up an improvement plan methodologically. You also look back on your education at your own leadership style and behavior as a manager/coordinator and know how to connect this with a vision of context.

Included in programme(s)

Health Care Management

School(s)

Health, Care & Vitality

share your talent. move the world.
