Learning outcomes

Programme learning outcomes of the National Bachelor Degree Profile :

6. Articulates a clear and convincing personal vision on care, service delivery, and leadership; reflects critically on areas of tension; and develops coherent goals for their own areas of responsibility, connecting these goals to both the internal organization and broader societal challenges.

7.Connects internal and/or external collaboration partners essential to the design, delivery, and development of services, and creates the conditions that enable professionals to actively contribute.

Content

Within this module we appeal to the personal qualities that are required of you as an innovator: innovative thinking, creativity, networking and creating value. You are invited to demonstrate these aspects by devising and realizing new or improved products/services and processes for your organization (unit). We pay attention to the Design Thinking method and matching tools.
It is precisely the combination of these tools that have a powerful impact, so that you are able to make a sustainable contribution to the innovation climate in your organization.

Included in programme(s)

Health Care Management

School(s)

Health, Care & Vitality
