Vak: Semester 2 Project — credits: 5

Vakcode	SEVM25S2P
Naam	Semester 2 Project
Studiejaar	2026-2027
ECTS credits	5
Taal	Engels
Coördinator	F. Martins
Werkvormen	Hoorcollege Projectonderwijs
Toetsen	Semester 2 Project - Opdracht

Leeruitkomsten

At the end of this module the student is able to:

- methodically design and implement a detailed smart-system proof of concept that leads to a specific solution.
- critically validate the answer to the research question/goal and sub-questions/goals through a logical line of reasoning that connects the research question to the specific solution.
- critically reflect on the investigation and results, recognizing strengths and weaknesses and indicating possible improvements to achieve a specific solution based on a smart system design.
- communicate the new insights, obtained by critically performing research, in a logical line of reasoning to a public of experts via a research paper and presentation, with high information density.

Inhoud

The course covers the following topics:
The student undertakes an assignment originating from the professional field, either at a company in Smart Systems or within one of the professorships affiliated with the SSE master's programme. The project serves as preparation for the working methods and expectations associated with the graduation project.

Opgenomen in opleiding(en)
