This module provides a theoretical and practical framework within which
students can gain and develop their knowledge and skills in the field of
Project Management. The course focuses on PM knowledge and skills development in an international context.
Details:
- PC lab: Command of MS project will be tested in week 6 (computer test).
- Since groups will be formed in week 1 students are strongly advised to attend the first class. If a student cannot come to the first class he is required to contact the teacher preferably prior to the first class but no later than on the day of the first class, so he/she can assign him to a group. If he contacts the teacher after the first day of class, he can no longer take part in the group work.
- Professional product will be assessed through the group report & presentations, active participation during workshops and guest lectures and individual computer test
- Workshop and guest lectures require active participation

Costs: 58 euro
