

Course: Physiotherapeutic Care: Integration practical

credits: 4

Course code	FYVB20FTIP	Modes of delivery	Practical / Training
Name	Physiotherapeutic Care: Integration practical		Treatment of patient
Study year	2022-2023	Assessments	Communication skills 2 - Skills test
ECTS credits	4		PT-care Integration Practice - Performance assessment
Language	Dutch, with parts in English		
Coordinator	H.A. Kranenburg		

Learning outcomes

2CD-FH. 91. The student can independently conduct a partial physiotherapeutic assessment for a client with a complex musculoskeletal problem, based on casuistry descriptions.

2CD-FH. 95. The student can independently conduct a partial physiotherapeutic assessment for a client with a complex peripheral neurological problem, based on casuistry descriptions.

2CD-FH. 99. The student can independently conduct a partial physiotherapeutic assessment for a client with a complex central neurological problem, based on casuistry descriptions.

2CD-FH. 108. The student can independently conduct a partial physiotherapeutic assessment for a client with complex cardiovascular problems, based on casuistry descriptions.

2CD-FH. 109. The student can independently conduct a partial physiotherapeutic assessment for a client with complex pulmonary problems, based on casuistry descriptions.

2CD-FH. 210. The student can independently conduct a partial physiotherapeutic treatment for a client with a complex musculoskeletal problem, based on casuistry descriptions.

2CD-FH. 214. The student can independently conduct a partial physiotherapeutic treatment for a client with a complex peripheral neurological problem, based on casuistry descriptions.

2CD-FH. 218. The student can independently conduct a partial physiotherapeutic treatment for a client with a complex central neurological problem, based on casuistry descriptions.

2CD-FH. 227. The student can independently conduct a partial physiotherapeutic treatment for a client with complex cardiovascular problems, based on casuistry descriptions.

2CD-FH. 228. The student can independently conduct a partial physiotherapeutic treatment for a client with complex pulmonary problems, based on casuistry descriptions.

INT 3CD-E/FH 7: The student can incorporate information from specialist literature written in English into his/her clinical practice.

Content

Physiotherapy treatment is based on results from scientific research and experiences from practice. In this course the student learns to act in accordance with the KNGF guidelines, the Evidence statements and international guidelines in the field of musculoskeletal, neurological and viscero-vascular health problems. Knowledge and control of the content of these guidelines and statements contributes to the quality of physiotherapy treatment. It concerns an integrated block of physiotherapy in which repetition and deepening of the content of block 1 to 7 will take place. The patient casuistry in this course and in the integrated practical exam are based on complex patient problems.

Included in programme(s)

B Physiotherapy
