

Course: In-House Clinical 1

credits: 2

Course code	FYVP16IST1	Modes of delivery	Work placement
Name	In-House Clinical 1	Assessments	In-House Clinical 1 - Report
Study year	2022-2023		
ECTS credits	2		
Language	Dutch, with parts in English		
Coordinator	H.A. Kranenburg		

Learning outcomes

1CD-E/C. 47. The student is able – whether before, during or after finishing physiotherapy treatment – to explain the partial or full treatment in question to the patient using language that they are able to understand and in accordance with the rules of professional communication.

1CD-C. 2. The student, during the in-house clinical and in cooperation with one of his peers, can record the data from an anamnesis in a paper and/or in-house digital client file.

1CD-C. 7. The student, during the in-house clinical and in cooperation with one of his peers, can record the data from a physiotherapeutic consultation in a paper and/or digital client file, in accordance with current regulations and legislation.

1CD-C. 10. The student, during the in-house clinical and in cooperation with one of his peers, can verbally inform a client about the results of a physiotherapeutic assessment, in lay terms and in compliance with the rules of professional communication.

1CD-FH. 15. The student can independently take an anamnesis from a client during the in-house clinical.

1CD-FH. 309. The student, during the in-house clinical and in cooperation with one of his peers, can set up a physiotherapeutic assessment plan for a client with a simple physical problem.

1CD-FH. 310. The student, during the in-house clinical and in cooperation with one of his peers, can set up a physiotherapeutic assessment plan for a client with a complex physical problem.

1CD-FH. 313. The student, during the in-house clinical and in cooperation with one of his peers, can conduct a partial physiotherapeutic assessment for a client with a simple physical problem.

1CD-FH. 314. The student, during the in-house clinical and in cooperation with one of his peers, can conduct a partial physiotherapeutic assessment for a client with a complex physical problem.

1OD-Sam 12. The student, during the in-house clinical, is capable of recognising the client as an equal dialogue partner who runs his own life.

1OD-O 27. The student can plan activities around clients in cooperation with his peers during the in-house clinical.

1OD-O 28. The student can organise activities around clients in cooperation with his peers during the in-house clinical.

Content

The work of a physiotherapist comprises assessment (and treatment), assistance and coaching of clients with health problems. During the studies of this physiotherapy program students will learn concepts and skills that they must use in their future work as physiotherapists. By covering the academic unit 'In-house clinical 1' satisfactorily, students develop capacities that belong to competency level 1 in order to be able to deal with 'real clients'. In this academic unit students' clinical reasoning is directly linked to the execution of relevant physiotherapeutic skills on specific patients, and dealing with clients is considered as more than a merely technical skill.

Included in programme(s)

B Physiotherapy

School(s)

School of Health Care Studies
