4. The student can draw up and assess relevant information about the control of operational processes within a simple setting.
5. The student is able to relate cultural aspects to operational decisions.

Content

Operations Management is about organizing resources in organisations to get to successful services and products. Operations Management is relevant for many aspects and levels of the company and in this course we aim to provide a broad perspective on the subject. Furthermore, the course will teach concepts and calculations for solving practical problems within the field of operations.
