Professional Skills

1. The student demonstrates personal leadership and a professional discerning attitude in dealing with work situations and considering diverse interests.
2. The student communicates in English (B2), both verbally and in writing, aiming at professional communication and advice.

Content

Doing business in Europe

(Culture, compliance and process)

Students should develop a process for a web-shop; first an organization sketch of the web-shop and then a process sketch of the sales process. Students should develop a sales process (database modeling / process modeling) where they need to comply to VAT requirements within Europe. VAT is the only tax that is not regulated in the European model treaty, but is based on a European directive. In case of a web store (especially with web purchases) there are a lot of VAT issues that entrepreneurs need to consider.

Student also needs to understand the history of the European integration to be effective in doing business in Europe. So, this project is a unique combination between culture (history), compliance (tax legislation) and business process.

- General purpose and goals for professional skills
 - Getting an understanding of what is involved in doing business in Europe
- Business tasks and products
 - Developing a business process considering VAT legislation in Europe
 - Describing the impact of VAT legislation on doing business in Europe
