Course code	IFVB19IKMTHI	**Modes of delivery**	Tutorial
Name	Theory of PSM	**Assessments**	Theory of PSM - Computer, organised by STAD examinations
Study year	2022-2023		
ECTS credits	4		
Language	Dutch, with parts in English		
Coordinator	-		

Learning outcomes

Per theme, the student:

Theme: Purchasing department
- explains the general core concepts of purchasing and uses them to describe the purchasing department's role in the organisation.

Theme: Supplier management
- explains the core concepts of sourcing and supplier management and defines and analyses sourcing and supplier management strategies in simple cases.

Theme: Purchasing process
- identifies the phases of the purchasing process along with their main objectives and obstacles and organises these phases in a simple case.

Theme: Purchasing analysis
- draws conclusions from the results of a simple quantitative and/or qualitative purchasing analysis and supplies recommendations for purchasing policy and purchasing process improvements.

Theme: Purchasing process requirements
- distinguishes between different purchasing organisation forms and advises on the most suitable form in simple situations.
- identifies the purchasing procedures and purchasing information systems customarily used in organisations and what objectives they serve.

Theme: Strategy and policy
explains the concepts of purchasing maturity, purchasing policy, purchasing strategy and purchasing plan, and assesses these for consistency and professionalism in a simple case.

Content

The student is familiar with and understands the theoretical underpinning a purchaser needs as regards purchasing theory.
