Learning outcomes

- Adequately anticipates and responds to people's needs and motivations, with due consideration for the aspects of productivity, behaviour, perception and satisfaction with the provision of facility services and facilities.
- Designs or re-designs the facilities recommendation or design in line with demand, applying the organisation's strategy as a starting point and taking all relevant stakeholders into account.
- Demonstrates professional competence in complex situations and environments.
- Demonstrates a professional attitude in complex situations and environments.

Content

Working on behalf of an organisation, the student carries out an analysis and delivers a recommendation or design for a complex facilities issue. Supervision is provided in the form of communities of learners, workshops and visits to the host organisation by the supervising lecturer. The assignment is elaborated into a graduation plan during the first phase of the programme. The student then receives feedback on the plan, which must finally be approved. The student presents the professional products to the client and gathers feedback on their performance. The student's personal and professional development are covered during the portfolio assessment.

Included in programme(s)

Facility Management, major International Facility Management
