- The student is capable of assessing the value of new developments and insights affecting their professional practice to promote the provision of health-driven, integral care.
- The student is capable of drawing on new developments and insights affecting their professional practice to promote the provision of health-driven, integral care.
- In the context of indicated and/or health care-related prevention, the student can independently expand a treatment process to promote patient health.

#### Content

In addition to the course Behaviour and Communication, the course Clinical Medicine & Pharmacotherapy is part of the learning trajectory Medical Practice. In this course PHLM19KGFT2-T "Digestion & Reproduction" common patient problems are addressed concerning the disciplines surgery, gynecology, internal medicine (gastrointestinal, nephrology, urology). These patient problems are the central themes for learning the medical-diagnostic and therapeutic process. Through lectures, tutorials and practical training sessions students learn clinical reasoning and how to act as a professional, both preventive and curative. This includes the ability to logically justify and execute a pharmacotherapeutic treatment plan.
