### Learning outcomes

The learning outcomes for the courses Clinical Medicine & Pharmacotherapy 1 to 7 are based on two of the seven CanMeds professional roles, namely:

#### Medical Expert:

- During curricular activities, the student demonstrates mastery of the knowledge within the subjects offered in this course unit, needed to perform effectively in the role of medical expert.
- As a medical expert, the student independently carries out the diagnostic process for common ailments in a manner tailored to the health problems and treatment demands presented by patients.
- As a medical expert, the student can, within the subjects offered in this course unit, formulate a treatment proposal for common ailments that is tailored to the health problems and treatment demands presented by patients.

#### Health Advocate:

- During curricular activities, the student demonstrates mastery of the knowledge needed to perform effectively in the role of health advocate.
- The student is capable of assessing the value of new developments and insights affecting their professional practice to promote the provision of health-driven, integral care.
- The student is capable of drawing on new developments and insights affecting their professional practice to promote the provision of health-driven, integral care.
- In the context of indicated and/or health care-related prevention, and within the subjects offered in this course unit, the student can independently expand a treatment process to promote patient health.

### Content

In addition to the course Behaviour and Communication, the course Clinical Medicine & Pharmacotherapy is part of the learning trajectory Medical Practice. In this course PHLM19KGFT7-T "Senses, Perception & Skin", dermatologic, ENT and ophthalmologic patient problems are the central themes for learning the medical-diagnostic process.

Through lectures, tutorials and practical training sessions students learn clinical reasoning and how to act as a professional, both preventive and curative. This includes the ability to logically justify and execute a pharmacotherapeutic treatment plan.
