### Learning outcomes

For the course Researcher 1-1, 1-2 en 1-3 the learning outcomes are formulated based on the CanMeds professional role Scholar, namely:

#### Scholar:

- During curricular activities, the student demonstrates mastery of the knowledge needed to perform effectively in the role of scholar.
- The student assesses findings from national/international scientific research for their relevance to medical practice, with due regard for methodological quality.
- The student can account for their own professional conduct on the basis of their interpretation of methodological and statistical aspects of a scientific article.
