<b>ECTS credits</b>	1		
<b>Language</b>	English		
<b>Coordinator</b>	H.A. Kranenburg		

### Learning outcomes

Learning outcomes:

1. The student is able to clarify his/her own tasks, roles and (professional) legislative rights of his/her future profession.
2. The student can explain which professions will be relevant for his/her future work.
3. The student can identify and define interprofessional problems which his/her own profession shares with other professions.
4. Together with other School of Health Care Studies students, the student carries out a Healthy Ageing activity.
5. The student demonstrates that he / she has applied the Effectuation principles, for example using a tested prototype.
6. Displaying an enterprising attitude, the student engages in an interdisciplinary project in order to arrive at an innovative recommendation and final product.

### Content

Students within the School of Health Care Studies will work together on an interprofessional assignment in which they contribute to Healthy Ageing. In mixed groups an interprofessional problem or question within this theme will be formulated. Students will learn about tasks, roles and competences of their own future profession, and those of the other professions. Entrepreneurial skills such as Effectuation will be used to create and build on solutions to the posed problem. Both the working process and the Healthy Ageing solutions will be presented during a final event.
