

Course: Introduction to energy law

credits: 5

Course code	REDB22IER	Modes of delivery	Lecture
Name	Introduction to energy law		Tutorial
Study year	2022-2023	Assessments	Introduction to energy law - Computer, organised by STAD examinations
ECTS credits	5		
Language	Dutch, with parts in English		
Coordinator	M. den Uijl		

Learning outcomes

Analysing, Level 2

1. Students lay out the facts of a clearly defined complex real-life legal situation and/or an open problem and rank them by legal relevance. Based on this ranking, they formulate the legal questions and are able to answer and substantiate these verbally and/or in writing. 2. Students work in a methodologically responsible fashion, using a plan of action and taking into account simple theoretical insights, some findings of existing research, relevant legislation and regulations, and case law. 3. Based on the above, students formulate written or verbal recommendations. 4. Students substantiate the choices they make in terms of legal questions, sources, plan of action and recommendations. 5. Students incorporate sources in their own text and establish connections between them.
