Learning outcomes

Analysing, Level 3

1. As a novice professional, the student is capable of analysing legal issues in a complex situation while taking account of the surrounding environment and drawing on multiple legal and non-legal sources. In doing so, the student draws on applied legal research and justifies their choice of sources: 1. Students lay out the facts of a complex real-life legal situation and/or an open problem and rank them by legal relevance. Based on this ranking, they formulate the legal questions and are able to answer and substantiate these verbally and/or in writing.
