

## Course: Regulation and litigation

credits: 5

**Course code** REVH20RGP  
**Name** Regulation and litigation  
**Study year** 2022-2023  
**ECTS credits** 5  
**Language** Dutch, with parts in English  
**Coordinator** M. den Uijl

**Modes of delivery** Tutorial  
**Assessments** Regulation and litigation - Computer, organised by STAD examinations

### Learning outcomes

#### Analysing, Level 3

As a novice professional, the student is capable of analysing legal issues in a complex situation while taking account of the surrounding environment and drawing on multiple legal and non-legal sources. In doing so, the student draws on applied legal research and justifies their choice of sources:

1. Students lay out the facts of a complex real-life legal situation and/or an open problem and rank them by legal relevance. Based on this ranking, they formulate the legal questions and are able to answer and substantiate these verbally and/or in writing.

#### Deciding, Level 3

The novice practitioner is able to determine the legal status of a complex legal issue and identify and substantiate the legal consequences for multiple individuals or legal entities:

1. The student can independently determine the legal position and identify the legal implications in a complex practical situation;  
 2. The student is able to make decisions after considering the interests of multiple parties and other stakeholders;  
 3. The student can explain how they arrived at their decision and weighed the various interests.
