Coordinator M. Klaassens

Modes of delivery Graduation project
Assessments TEST-01 - Report
TEST-02 - Presentation

Learning outcomes

1. The student analyzes the complex practical issue within the domain of care and welfare in co-creation with relevant stakeholders.
2. The student uses an appropriate research approach for the practical issue and substantiates this.
3. Together with relevant stakeholders, the student methodically generates new ideas, plans or products with regard to the complex practical issue.
4. With the practice-oriented research, the student contributes to the creation of impact in practice.
5. The student demonstrates a reflective attitude towards his/her own role as a starting professional and towards the research process.

Content

Graduation involves carrying out an integral graduation assignment. With this assignment, we aim to ensure that at the end of the training you are demonstrably able to set up a coherent research and conduct it thoroughly, based on research methodology.
