Learning outcomes

Learning Outcome 1.2.1

The student knows the development phases of organizations according to different growth models.

Learning Outcome 1.2.2

The student knows how to distinguish the different functional sub-areas in organizations and describe them in terms of content.

Learning Outcome 1.2.3

The student describes the structuring and management of processes in organizations

Learning Outcome 1.2.4

The student is able to formulate and substantiate a businesslike and convincing message in writing. Explain with the help of examples of current practical experiences from care and welfare what meaning this has for the student

Learning Outcome 1.2.5

The student demonstrates elementary conversation skills in a semi-structured interview in a medium complex, pre-structured context within an organization in care and welfare.

Learning Outcome 1.2.6

The student is able to explain what meaning this has for the student with the help of examples of current practical experiences from care and welfare.

Content

This module focuses on getting to know the system organization. We will zoom in on the system organization and a number of important production factors, such as personnel and finances. In addition, we will increase our skills with regard to professional acting, writing and interviewing. You will also do an internship for a week during this period.
