Learning outcomes

The student arrives at a preliminary problem analysis and approach to a complex facility issue based on preliminary research.

Content

The student performs an analysis for an organisation and provides advice or a design for a complex facility issue. Supervision takes place in communities of learners in combination with workshops and organisational visits by the supervising lecturer. In the first phase of the programme, the assignment is developed into a graduation plan, on which the student receives feedback and which has to be approved.
The student presents the professional products to the client and collects feedback on his/her performance. The portfolio assessment covers the student's personal and professional development.
