

Course: Researcher 2

credits: 4

Course code	PHLM25ONZ2	Modes of delivery	Tutorial
Name	Researcher 2	Assessments	Data collection in practice - Written, organised by School
Study year	2025-2026		Research proposal - Written, organised by School
ECTS credits	4		
Language	Dutch, with parts in English		
Coordinator	K.M. Menninga		

Learning outcomes

Scientific thinking

LU-WD 2.2.: The student can independently carry out practice-oriented scientific research of sufficient methodological quality in order to actively contribute to knowledge creation.

Content

The research proposal is assessed shortly after the start of the second academic year. If this gets a 'go', the student may start collecting research data in practice. When data collection is completed, it is checked by the supervising lecturer and then released for the necessary analyzes as laid down in advance in the research proposal. All this of being able to answer the research question and any sub-questions formulated for the student's own practice-oriented research. At the end (year 3) of the course, a Master's thesis will be delivered and defended orally.

Included in programme(s)

Physician Assistant

School(s)

School of Health Care Studies
