Course: Physiotherapeutic Care 2: Skills & Integration — credits: 5

Course code	PIVP25PC2SI
Name	Physiotherapeutic Care 2: Skills & Integration
Study year	2026-2027
ECTS credits	5
Language	English
Coordinator	M. van Ark
Modes of delivery	Individual supervision Practical / Training Self-study
Assessments	Assessment and treatment 2 - Assignment Performance Assessment 1 - Performance assessment

Learning outcomes

Learning Outcomes

The student is able, based on described case studies, to independently perform an anamnesis and perform a partial physiotherapeutic examination within an educational setting for a client with a simple musculoskeletal problem. Professional role: HCP,HP,RP-1

The student is able, based on described case studies, to independently carry out a physiotherapeutic partial treatment for a client with a single musculoskeletal problem. Professional role: HCP,HP,RP-1

The student is able, within the context of indicated and/or care-related prevention and under the supervision of a teacher, to provide education to clients and their relatives and/or other involved parties in language that is understandable to them and is in line with the rules of professional communication, and to verbally inform them about health-promoting behaviour and the clients' own responsibility in this regard. Professional role: HP,RP,COM-1

The student is able, in an educational setting, to interpret information from (English-language) professional literature and explain it to fellow students. Professional role: HCP,COM-1

The student expresses their own cultural identity within the educational setting and applies this in interactions with people from another culture. Professional role: RP,COM-1

Content

PT-care 2 consists of 2 courses of 5 EC that are interwoven with each other. Course 1: MSC upper extremity & cervical spine and course 2: skills and integration.
This course concerns skills and integration and covers the more practical part of PT-care 2.

Musculoskeletal conditions of the upper extremity and the cervical spine are very common problems in the daily practice of physiotherapy. During this course the student must be able to show sufficient medical-biological, behavioural-communicative and physiotherapeutic knowledge and skills to assess and treat patients with musculoskeletal complaints of the upper extremity and cervical spine.
This course will be completed with a performance assessment in which a student, under the guidance of the teacher, performs a (partial) examination and (partial) treatment based on a case. Assessment and treatment skills will be assessed formatively during the course.
