

## Programme

### Qualification awarded

Bachelor of Science

### Length of the programme

48 months

### ECTS credits

240

### Level of qualification

Bachelor

### Mode

Full-time

### Language

Dutch, with parts in English

### School

School of Marketing  
Management and Financial  
Economic Management

### Locations

Groningen

## Marketing Major Digital Marketing

### Profile of the programme

To acquire the integrated competences in the areas of marketing, sales, organisation and communication, CE students are pragmatic and have excellent communication and social skills. They can communicate effectively in at least two foreign languages. They can solve problems, produce a marketing and business plan, present this plan in a professional manner and manage others, both independently and as part of a team. They have an excellent grasp of key market research methods and extensive knowledge of and insight into ICT. They also have the skills to translate this knowledge into activities at a strategic, tactical and operational level. Broad knowledge of economics, supported by management skills, forms the basis for their insightful approach to a wide range of professional situations. They can rapidly perform an accurate assessment of the individual or company they are dealing with. Their personal qualities include: ambition, perseverance, a focus on results, vision, team spirit, ability to cope with stress, an international outlook and efficiency both when working individually and as part of a group. These qualities enable them to rapidly, accurately and successfully translate clients' needs and desires into strategic commercial policy and operational action.

### CE- Digital Marketing Management Major

Online marketing is key to the Digital Marketing Management major. ICT plays a crucial role in this context. In three blocks of 15 credits, you will be given the opportunity to deepen the knowledge you attained during your general introduction to online marketing (tooling and e-commerce), digital data analysis and application. The increasing influence of digital sources is responsible for the corresponding growth of the online marketing field. This is responsible for the huge demand from the labour market for a wide range of professionals with digital marketing expertise.

### Learning outcomes

The programme equips the student with the competences required of a professional in the field of Marketing. These are:

- **SETTING A COURSE**; The Marketing professional maps out a marketing approach. He/she does this based on his/her vision, opportunities he/she identifies in the market and the long-term competitive advantage of the organisation where he/she works. Because he/she does not work within a vacuum, the Marketing professional is a bridge-builder who connects both knowledge and people.
- **CREATING VALUE**; The Marketing professional gives substance to the marketing approach by creating long-term value for both the client, the organisation and society. He/she does this based on an analysis of data and research, with the aim of gauging the client's actual behaviour. He/she is able to translate this analysis into an action plan.
- **BUSINESS DEVELOPMENT**; Via co-creation with stakeholders, the Marketing professional designs unique and/or innovative concepts and revenue models to optimise value for all relevant stakeholders. He/she anticipates and/or initiates change and gains the support of the stakeholders during the development process.
- **IMPLEMENTING**; Based on the developed concept, the Marketing professional produces a sustainable marketing product or sub-product or service for existing and potential stakeholders. The Marketing professional puts forward creative solutions, facilitates parts of the implementation process, shows perseverance and takes financial responsibility in order to achieve the desired commercial result together with internal and external parties. He/she secures stakeholders' commitment during implementation.
