

### Programme

**Qualification awarded** Bachelor of Science

Length of the programme 48 months

ECTS credits

Level of qualification Bachelor

**Mode** Dual

**Language** Dutch, with parts in English

School School of Nursing

Locations Groningen

# Nursing

#### Profile of the programme

The Bachelor of Nursing at the Academy of Nursing develops students to become caring professional nurses who operate at the heart of the community; play an essential role within their professional field and specific work environment, have an eye for innovation leadership and make a practical continuous contribution to the quality of care.

The Academy of Nursing inspires students by offering challenging assignments that are derived from professional nursing practice and are linked to the developments within the nursing profession, professional nursing practice and society in general.

Through intensive contact with the professional field, the Bachelor of Nursing program strives to develop a curriculum that is in line with the needs within society, and anticipates on new developments in the profession, both nationally and internationally.

As a starting professional, the nurse is a generalist who provides high-quality, compassionate and respectful care. The graduate nurse demonstrates a professional attitude at all times. The graduate nurse is able to work in various healthcare fields. The Canadian Medical Education Directions for Specialists (CanMEDS) roles that a nurse needs to work in these different work settings are the same.

The Bachelor of Nursing program offers students the greatest possible chance of a place on the labor market after graduation.

CanMEDS roles		Areas of competence
1. Nurse Expert & P	Professional Care Provide	er Professional practice
2. Communicator		Communication
3. Collaborator		Collaboration
4. Evidence-based I	Practice Scholar	Knowledge & Science
5. Health Promotor		Social practice (civic professionalism)
6. Organizer		Organization
7. Professional & Quality Care Facilitator		Professionalism & Leadership in Quality & Safety
	-	
Learning outcome		
CanMEDS-role	Core concepts	Learning outcomes
Healthcare provider	r Clinical reasoning	The continual process-based collection and analysis of data, designed to help the healthcare provider identify the patient's needs and problems and select the right outcomes and interventional procedures.
Healthcare provider	r Providing the care	Providing comprehensive care by independently performing all the necessary nursing procedures (including risky procedures and procedures which are only allowed to be carried out by competent medical practitioners) in complex situations, having due regard for applicable laws and regulations and always keeping in mind the patient's overall condition.
Healthcare provider	Improving people's self-management skills	Helping patients, their loved ones and their social contacts improve their self-management skills, with a view to allowing them to be better able, despite their health issues, to perform activities of daily living and enjoy a better quality of life. Determining and describing the nature, duration, amount and
Healthcare provider	Referring patients to other doctors	purpose of the care and nursing the client needs and organising for them to receive that care and nursing, in consultation with the client, on the basis of the problems with which the patient has been diagnosed or of problems yet to be examined and diagnosed.
CanMEDS-role	Core concepts	Learning outcomes
Communicator	Personalised approach to communication	Actively listening to the patient, providing the patient with information, allowing them to make decisions with regard to the care with which he/she is to be provided, and treating the patient like a unique person; acting alternatively like a guide, coach, expert or adviser, depending on what is needed at the time.
Communicator	Using ICT	Utilising the latest information and communications technologies and providing patients with remote healthcare (eHealth), in addition to face-to-face meetings with the patients.
CanMEDS-role	Core concepts	Learning outcomes

		Maintaining contact with the patient, their loved ones and
Partner and	Professional	social contacts, maintaining long-term care-based relationships
collaborator	relationship	and carefully cutting back on contacts as necessary.
		Systematically consulting the patient and their loved ones on
Partner and		the nursing care to be administered, ensuring that various
collaborator	Joint decision-making	sources of knowledge are explicitly considered, and taking into
		consideration the patient's values when decisions are to be
		made.
		Acting on the basis of one's own expertise as a nurse and collaborating with representatives of one's own discipline and
Partner and	Multidisciplinary	other disciplines (both from the healthcare industry and from
collaborator	collaboration	other industries) on an equal footing with regard to
		multidisciplinary care and treatment goals.
Partner and		Sharing knowledge and information so as to guarantee the
collaborator	Continuity of care	uninterrupted involvement in the patient's therapy of the
		necessary healthcare providers over the course of time.
CanMEDS-role	Core concepts	Learning outcomes
		In situations where care must be provided and where things
