Leeruitkomsten

Upon completion of this course, students should be able to:

- Understand the key principles, components and interactions of strategic business planning
- Identify and assess major business model shifts that will create more added value and relevance to customers
- Understand and apply multidisciplinary components & tools and how these impact on and interact with an integrated Business Plan.
- Develop an integrated European Business Plan related to the circular economy and with a product or service stream between two European countries.
- Build content, present and critically reflect on final output through installing an innovation mindset, active group collaboration and teamwork.

Competencies from the IB Programme Learning Outcomes (level 3):
WT 1, WT 2, WT 3, WW 7, LW 10, LW 14, TWM 24

Inhoud

The course aims to install a holistic perspective on strategic business planning within the business environment of the European Union (EU-27); to rethink current business models and to inspire students to shift from linear to circular and from traditional pipeline to platform business models and with an integrated multi-disciplinary approach (e.g. marketing, supply chain management, finance).
