Inhoud

In this module, students present the results of this minor to the users during a Walk Inn/meeting. This Walk Inn enables users to see which procedures, ideas and/or solutions were developed during the process, while also enabling students to gauge the extent to which their ideas meet the expectations of users and their environment. Users may also be able to apply and/or further develop the results.

The Walk Inn is almost the concluding component of the minor, an opportunity for students to show the public (users and professionals) what they have learnt and to explain, elaborate and justify their ideas. The Walk Inn is not the only important element of this module, however. Other important elements include analysis of similar projects regarding subject, communication and organisation, using this information to organise the Walk Inn, present and explain your ideas and results to the users and professionals, use the feedback of the Walk Inn to improve your ideas/results and reflect on the process of this module.
