Leeruitkomsten

The student is able:

- to start a company by following the issues described in the planning of Jong Ondernemen. These issues involve:
 - coming up with a promising product-market combination;
 - executing a market analysis;
 - design and producing a product;
 - enrolment at Jong Ondernemen;
 - developing a marketing plan; opening of a bank account.
- to get support for the business plan from stock holders financing the plan;
- to produce and sell products, by showing he is capable of: selling of stocks; organising a stockholders meeting; marketing and selling activities.

Inhoud

In this study unit, you will form a student company (Stuco) with students from other Engineering bachelors at Hanze UAS. You have to show entrepreneurial behaviour while setting up a company, and getting knowledge about production, selling, buying, financial management, marketing, organization and management. It will be necessary to work in teams to reach the goals of the company.
