Vak: Playful Pasts & Futures — credits: 5

Vakcode	GTVP21PPF
Naam	Playful Pasts & Futures
Studiejaar	2025-2026
ECTS credits	5
Taal	Engels
Coördinator	S.A. Smith
Werkvormen	Onderwijs
Toetsen	Playful Pasts & Futures - Overige toetsing

Leeruitkomsten

Learning Outcomes

This Course has seven Programme Learning Outcomes.

Programme Learning Outcomes

A2. The student considers contextual factors in the implementation of their solutions.
A3. The student can construct concepts and relates these to relevant theory and the needs of the users.
C2. The student employs appropriate prototyping methods to develop digital interactive prototypes.
E2. The student can compare and choose appropriate channels and business models for their solution.
F1. The student experiments with new technological trends and models a realisable solution.
F2. The student can experiment with innovative concepts to address complex or complicated situations.
F3. The student is aware of the impact of existing technologies and their consequences.

Inhoud

Content

Playful Pasts and Futures is a course that historicises games and confronts students with the questions like “Why do we study games?”. Students will learn how play is a form of learning and how we use games to explore the possibilities of new technology. The course touches on the history of the internet, technology and games and the ethics connected to it.

Essential to understanding interactive systems and their possibilities is to be able to see the elements of which a system consists and how they relate to the experience the system intends to deliver. For budding new technologies these elements might be clear, but the experiences they could deliver are still being explored. A fundamental part of exploring these experiences is to find goals and interactions for new technology that stimulates familiarization and sparks engaging interaction.

By being able to assess and identify the core tenets of interactive systems, the student is challenged to reassess their own relation to the interactive systems they know. In turn, this understanding opens the student up for identifying new interactions or applying old interactions in novel ways; and enables the student to assess the current interactive digital media industries and identify new opportunities to act on. The course is assessed by a poster presentation and a written report.
