Exchange Industrial Automation (spring)

Programmabeschrijving

This exchange programme is offered in semester 2, starting February
The minor Industrial Automation will show students the necessary steps involved in the process of automation and optimizing of both industrial environments as well as customized products. This includes analyzing the process, selecting the sensors to collect the essential data, modifying and transferring this data and selection and interaction with the applied actuators. To keep the topics actual, there will be a lot of interaction and collaboration with the industry within this minor

Leeruitkomsten

The scope of this programme is on analyzing and optimizing production facilities and processes. The topics covered in this minor will include:

- Industrial robots and automation.
- Actuator systems and sensor techniques.
- Computer Vision and Image Processing.
- Power Electronics.
- Applied Mechanics.
- Operation Management.
